TECHNICAL SPECIFICATION OF WORK

14. Detailed description and nature of works to be carried out:

Sodium Technology Complex (STC) of FRTG is located on the southwest part of newly developing IGCAR North site. A large experimental sodium facility is constructed at STC and is fully operational. The work included in this tender in general providing technical assistance for surface cleaning of components, panels, structure, pipelines, valves, plant area, material and section storage rooms, handling and transportation of argon cylinder & materials etc in Sodium Technology Complex (STC) in FRTG. This specification covers the detail technical requirements for the works related to Sodium Technology Complex in FRTG, IGCAR.

The proposed site for this work is at IGCAR, Kalpakkam near Sadhurangapattinam. This site is accessible by road from Chennai via Chengalpattu, Thirukkalikundram and also via Mahabalipuram.

Site investigation is permitted. The Contractor should acknowledge that he has satisfied himself as to the nature and location of the work, the general and local conditions, particularly those bearing upon transportation, disposal, handling and storage of materials, availability of labour, water, electric power, canteen, roads and uncertainties of weather, or similar physical conditions of the site. Any failure of the Contractor to acquaint himself with all the available information concerning these conditions will not relieve him from responsibility for estimating properly the difficulty or cost of successfully performing the work. Non-familiarity with the site conditions will not be considered a reason either for extra claims or for not carrying out the work in strict conformity with the specifications. The Contractor shall note that if any clarifications regarding Specifications, Conditions of Contract, Schedule of Quantities, Scope of Work etc. are required, he should contact the office of the Engineer-In-Charge. No claim on account of ambiguity in any respect will be entertained.

Scope of work shall include, but shall not be limited to,

- a) Shifting of components like pipes, vessel, pumps, channels, angles, flow meters, level probes, beams, CS plates, handrail pipes, panels, scrap materials, cupboard, tables, various types of chair, re-arrangement of material in high bay and low bay of STC from IGCAR Store/Steel yard to STC and vice versa and within STC building.
- b) Segregation of metals and non-metals, transferring in scrap pit and cleaning.
- c) Transportation of empty/full argon gas cylinders to and fro from stores to STC and within STC. Re-locating the argon cylinders at designated place.
- d) Surface cleaning of components such as vessel, pumps, channels, angles, flow meters, level probes, beams, CS plates, handrail pipes, headers, valves, structure, platforms, common passage, concrete walls, dump tank and pits, dyke walls etc. on regular basis.,
- e) Surface cleaning of electrical and instrumentation panels like PDB, LDP, SP, ECP, CP, and HCP on regular basis.
- f) General cleaning of material and section storage rooms including stored items/equipments.
- g) Plant area cleaning to maintain cleanliness and neatness of loop area.
- h) To execute these works contractor shall provide proper masking, self protection(apron), safety equipment, necessary equipment for cleaning like various types of brooms, scrubber, bucket, dust collector, clothes etc

All the works under this contract are to be carried out under strict supervision of

Department official. The contractor's worker shall carry out the work as per the guidance of the Department personnel for all the work indicated in the schedule of work.

14.1 Surface cleaning of pipe lines

In STC, sodium pipe lines are erected and are yet to be covered with insulation. These pipe lines exposed to open atmosphere are prone to accumulation of dust, dirt. In order to remove these dust & dirt, surface cleaning of these pipelines will be carried out on regular basis. Also after providing thermal insulation and cladding on the pipelines, oil, grease, dust, dirt on aluminum cladding shall be thoroughly cleaned for aesthetic appearance.

14.2. Surface area cleaning of flow meters, EM pump, valves etc

Flow meters are used in STC sodium loop to measure sodium flow through different paths. Dust and dirt's getting accumulated on the permanent magnet leads to incorrect readings. Similarly Bellows sealed valves, EM pumps, Diaphragm valves, Pressure gauge, Pressure regulator, Safety valves, Pressure switch, Levels probes, Oxygen and Moisture analyzer, thermo wells etc are being installed in sodium loop and are critical. Regular cleaning of these instruments is required. These instruments are sensitive and critical hence semi-skilled person shall be employed for this work. This work shall be executed under guidance of department official. Contractor should obtain a certificate from concerned agency who has executed these types of works.

14.3 Surface area cleaning of sodium storage tank (SST), dump pit etc

Sodium dump pit size is 12m L x 7m B x 7m H where two numbers of sodium storage tanks each with 75 m³ volume are installed to store liquid sodium in ground floor. Regular and routine surface areas cleaning of these dump tank, pit area, dyke wall and walkway passage around pit need to clean on regular basis. All the dirt, dust and cobweb shall be cleaned. To execute these works contractor shall provide proper masking, self protection (apron), safety equipment, necessary equipment for cleaning like various types of brooms, scrubber, bucket, dust collector, clothes etc. Asthma person is not permitted inside dump pit. These areas shall be thoroughly cleaned for aesthetic appearance.

14.4 Surface area cleaning of loop components

In STC, three numbers of test vessels are used to carry out different experiments in liquid sodium and are located across 2nd, 3rd & 4th floor elevations. There is sodium cleaning vessel is also erected in the same structure. There are other equipments like PV, CT, HV, EP, AHX, VT, CTE, SS, EHX, compressor, vacuum pump, blowers, argon header, argon cylinder storage stand, compressor header molecular sieves, BASF etc are installed in loop. Maximum height of vessel is around 14 meter. Regular and routine surface areas cleaning of these vessels are required. All the dirt, dust, cobweb shall be thoroughly cleaned. Since vessel height is more a person having the giddiness shall not be employed for these works. To execute these works contractor shall provide proper masking, self protection (apron), safety equipment, necessary equipment for cleaning like various types of brooms, scrubber, bucket, dust collector, clothes etc.

14.5 Surface area cleaning of electrical and instrumentation panels

Power supply to the components such as EMP, surface and immersion heaters, heater vessels, compressor, vacuum pump, blowers etc., will be provided from HCP's and CP's and the process parameters will be obtained and processed through the FIP and CIP. There are other panels also like SP, ECP, and ELDP etc. These panels are located both in fields, toilets and control room. Frequent surface area cleaning of these panels is necessary to maintain these panels in good condition. For aesthetic appearance of these panels, the dust, dirt on these panels has to be removed periodically. To execute these works contractor shall provide proper masking, self protection(apron), safety equipment, non-electrical conducting gloves, necessary equipment for cleaning like various types of brooms, scrubber,

bucket, dust collector, clothes etc.

14.6 Structural and plant area up keeping

Dimension of structure are 20m L x 15m B x 25m. Size of STC building is 40m L x 21m B x 43m. Areas include structure with floor, platform and staircase, base area of building, walkway passage, storage rooms, entrance/exit, east/west area within fencing etc. These plant areas need to be clean on regular basis. For ensuring trouble free and safe working, unwanted items such as wool, wood, polythene sheets, metal scarp, insulation materials, wire scrap etc., are to be removed from the loop area. This also includes area cleaning of materials storage room, ac rooms, other rooms etc. Also oil, grease, dust, paints, dirt, cobweb etc formed in structures, platform, and floors shall be thoroughly cleaned. Floors in high and low bay and approachable height in concrete walls shall be thoroughly cleaned. These needs to done periodically to keep the sodium loops and surrounding clean and neat.

14.7 Shifting of full/empty gas cylinders

To keep sodium loop under inert atmospheres and any SS welding works, argon gas is used. Movement of empty/full argon cylinder from IGCAR Store to STC and back is essential requirement. Hence to cater the requirement of argon gas, argon gas cylinders will be received from central stores, IGCAR and shifting or movement of these cylinders (full/empty) to and fro from stores to STC and vice versa will be carried out on regular basis. Disconnection of empty gas cylinders and connecting back the filled cylinders in their respective headers is in the scope of contractor. The entire transport vehicle and manpower needed for shifting is in the scope of contractor. Depending upon the need, these cylinders will be shifted from storage bay to the work location frequently or within plant area for welding, commissioning purposes. These cylinders shall be handled carefully with utmost safety precaution.

14.8 Metallic and Non-metallic material handling

On regular basis, mechanical maintenance and other related works will be carried out in Sodium Technology Complex (STC). The items like vessel, tanks, pipes, rods, vapour traps, level probe, pressure pot, vent pots, blowers, EM pumps, vacuum pump, tables, cupboard, tables, various types of chair, motors, bellows sealed valves, channels, angles, beams, plates, handrail pipes, scrap material etc., shifting and moving is required at STC either from IGCAR store or steel yard or to chemical cleaning area in IGCAR, or within the STC building. Based on experimental requirements new components may also be introduced. These components need to be shifted to chemical area before introducing/ after removal from loop. Removal/erection of materials from/to the appropriate location in loop and re-arrangement of material in high bay and low bay of STC is included. This includes segregation of metals and non-metals and transportation and disposal to IGCAR Stores. Contractor should arrange necessary transport vehicle and handling equipment with trained manpower. Contractor should provide personal protective equipments for his employees. Contractor shall send his workers for safety induction training or any other safety training as prescribed by IGCAR safety officer. Contractor should arrange appropriate vehicle for material handling as well as for his employee. No tools/Cranes/Hydra/battery trolley, lifting belts, ladder etc will be arranged from IGCAR side for materials handlings. Taking these requirements contractors should quote the rate as given in scheduled of quantity.

14.9 Material storage room and sectional store room up keeping.

Dimension of material storage room is 12m L x 8m B x 15m and other electrical, mechanical section store rooms are 5m L x 5m B x 5m. A total of 12 sectional store rooms and one material storage rooms are there in STC. These room areas need to be clean on regular basis for general cleaning, cob web removal, ceiling cleaning, window cleaning etc. For ensuring trouble free and safe working, unwanted items such as wool, wood, polythene sheets, metal scarp, insulation materials, wire scrap etc., are to be removed from the storage room area. Items stored in respective room shall be thoroughly cleaned.

3 INSTRUCTION & GUIDANCE TO TENDERER

3.1 Submission of Tender:

- (a) Tender shall be deemed to have been submitted after careful study and examination of the tender document with full understanding of its implications.
- (b) Submission of a tender by a Tenderer implies that he has read and understood this notice and all other contract documents and has made himself aware of the scope and specifications of the work to be done and local conditions and factors having a bearing on the execution of the work.
- (c) All information called for should be furnished against the relevant columns in the forms. If for any reason, information is uploaded on a separate sheet, this fact should be mentioned against the relevant column. FORM OF PERFORMANCE GUARANTEE (BANK GUARANTEE) BOND

In consideration of the President of India (hereinafter called "The Government") having agreed under the terms and conditions of Letter of Intent/ Agreement No. _____ dated _____ made between _____ and _____ (hereinafter called as said Contractor) for the work _____ (hereinafter called "the said Letter of Intent / Agreement") having agreed to production of an irrevocable bank Guarantee for Rs. _____ (Rupees _____) only, as a security / guarantee from the contractor(s) for compliance of his obligations in accordance with the terms and conditions in the said agreement.

2. We _____ (Indicate the name of the Bank) (hereinafter referred to as "the Bank") hereby undertake to pay to the Government an amount not exceeding Rs. _____ (Rupees _____) only on demand by the Government.

3. We _____ (indicate the name of Bank) do hereby undertake to pay the amounts due and payable under this guarantee without any demur, merely on a demand from the Government stating that the amount claimed is required to meet the recoveries due or likely to be due from the said Contractor. Any such demand made on the bank shall be conclusive as regards the amount due and payable by the Bank under this guarantee. However, our liability under this guarantee shall be restricted to an amount not exceeding Rs. _____ (Rupees _____) only.

4. We, the said bank, further undertake to pay to the Government any money so demanded notwithstanding any dispute or disputes raised by the Contractor in any suit or proceeding pending before any Court or Tribunal relating thereto, our liability under this present being absolute and unequivocal. The payment so made by us under this bond shall be a valid discharge of our liability for payment there under and the Contractor shall have no claim against us for making such payment.

5. We _____ (indicate the name of Bank) further agree that the guarantee herein contained shall remain in full force and effect during the period that would be taken for the performance of the said Agreement and that it shall continue to be enforceable till all the dues of the Government under or by virtue of the said Agreement have been fully paid and its claims satisfied or discharged or till Officer-in-charge on behalf of the Government certifies that the terms and conditions of the said Agreement have been fully and properly carried out by the said Contractor and accordingly discharges this guarantee.

6. We _____ (indicate the name of Bank) further agree with the Government that the Government shall have the fullest liberty without our consent and without affecting in any manner our obligations hereunder to vary any of the terms and conditions of the said Agreement or to extend time of performance by the said Contractor from time to time or to postpone for any time or from time to time any of the powers exercisable by the Government against the said Contractor and to forbear or enforce any of the terms and conditions relating to the said Agreement and we shall not be relieved from our liability by reason of any such variation, or extension being granted to the said Contractor or for any forbearance, act of omission on the part of the Government or any indulgence by the Government to the said Contractor or by

any such matter or thing whatsoever which under the law relating to sureties would, but for this provision, have effect of so relieving us.

7. This guarantee will not be discharged due to the change in the constitution of the Bank or the Contractor.

8. We, _____(indicate the name of Bank) lastly undertake not to revoke this guarantee except with the previous consent of the Government in writing. This guarantee shall be valid up to (date) unless extended on demand.

9. Notwithstanding anything mentioned above, our liability against this guarantee is restricted to Rs _____ (Rs. _____ only) and unless a claim in writing is lodged with us within six months of the date of expiry or the extended date of expiry of this guarantee, all our liabilities under this guarantee shall stand discharged.
